Portfolio: <https://datng87.github.io/>

## SUMMARY

Detail-oriented Data Analyst with extensive experience in Supply Chain and Manufacturing, passionate to share hidden treasures laid under the coverage of data to organizations. Earned a Certificate in Data Analysis from Monash University to equip me with updated analysis tools and statistical packages. Experienced in building dashboards for management to monitor KPI and make data-driven decisions. Strong analytical and problem solving skills with the ability to discover insights from data and present meaningful stories to audiences. Excellent at mathematics, statistics, and communication skills, as well as a commitment to delivering exceptional results and meeting deadlines.

## TECHNICAL SKILLS

**Programming Languages:** SQL, Python, Spark, R, VBA, JavaScript, HTML5,

**Applications:** Excel, MySQL, Tableau, Power BI, PostgreSQL, GitHub, MongoDB.

**Tools:** ERD design, SQLAlchemy, Pandas, Numpy, pyspark, Jupyter Notebooks, AWS, S3, Seaborn, Matplotlib, Git, Flask, splinter, BeautifulSoup, scipy, Scikit learn, TensorFlow.

## PROJECTS

**World coffee consumption ETL** | [https://github.com/datng87/world\\_alcohol\\_ETL](https://github.com/datng87/world_alcohol_ETL) | <https://coffee-worldwide.herokuapp.com/>

- The project applied ETL concepts (Extract, Transform, Load) to collect the worldwide coffee consumption data, complete data modelling, and data manipulation to ensure data quality, data integrity, and data accuracy, and then store them in a designed structured SQL database. A web app is also built to visualise the data for analysing.
- Core responsibilities: Developed a Flask app to connect, create SQL queries to databases, and created the data visualisation (choropleth map, interactive charts).
- Analytical tools / languages used: Postgres SQL, ERD design, Python, SQLAlchemy, Flask, Bootstrap, Plotly.js, ChartJS, D3.js.

**Movie rating prediction** | [https://github.com/datng87/movies\\_success\\_prediction](https://github.com/datng87/movies_success_prediction) | <https://movies-rating-prediction.herokuapp.com/>

- The project is to build a web application to predict the rating of movies based on big, complex datasets extracted from Web scraping and 3 data sources APIs: IMDB, OMDb, themoviedb using Machine Learning in Python with various models tested.
- Core responsibilities: work on Data extraction; complete data wrangling using Pandas; pre-process data including encoding category data, normalize data; train and test data in machine learning using various models for best accuracy.
- Analytical tools / languages used: Python, Pandas, scikit-learn, GridSearchCV, BeautifulSoup, seaborn, Jupyter Notebook, flask, HTML, JavaScript, D3.js.

## EXPERIENCE

**Buyer**

**ASSA ABLOY Australia PTY LTD**

Nov 2020 – Now  
Melbourne, VIC

- Improve 15% year-to-year inventory level in 2022 by developing inventory BI dashboard using Python and PowerBI which helps the management to monitor and support decision-making.
- Create supply demand report, backorder report to improve the replenishment accuracy.

- Create scripts using Excel Visual Basic Analysis (VBA) to automate the purchasing processes and reporting, resulting in a saving of 600 hours of manual work annually.
- Manage a purchasing portfolio of \$13Mils/year, timely release of purchase orders in line with agreed frequency, parameters & financial constraints using AX 2012 ERP.
- Negotiate, influence and manage supplier agreements.
- Build relationship and maintain relationship with suppliers.
- Identify cost-cutting opportunities. Implement and administer cost-saving projects.
- Control and demonstrate continuous improvement in optimising inventory levels, lead time, safety stock, and replenishment parameters ultimately leading to a reduction in backorders and lost sales while ensuring quality and delivery service level.

#### **Production Planner**

Feb 2019– Oct 2020

#### **CMS Electracom**

Melbourne, VIC

- Built automated prioritization Excel reports for production and dispatch teams that decreased the number of urgent late orders by 80%.
- Ensured up-to-date data reflected on ERP system.
- Created the production schedule and priorities for production team.
- Coordinated with production, procurement and warehouse team to ensure the production schedule was met and orders were shipped to customers on time.
- Created recovery plans for late orders, and resolved issues affecting DIFOT.
- Arranged with Customer Service on current ordering status.

#### **Production planner and New Product Integrator**

Nov 2011 – Jan 2018

#### **Intel**

Ho Chi Minh City, Vietnam

- Produced One-click-fie using VBA to automate the kitting and WIP (work in progress) controlling process, resulting in a 15% reduction of the cycle time of chipset products.
- Built an online splitting and merging system to enable the traceable split merge capability at Wirebond module which helped increasing the operation utilization by 20% and removed the bottle neck.
- Established manufacturing systems, standard working instructions, specifications (SPEC) documentation for new business processes, and trained the technicians.
- Lead manufacturing team to enable new product capabilities.
- Created the production schedules of 6 million units per week (including conversion schedules, changeover schedules) and managed inventory planning.
- Collaborated with internal stakeholders (Module Engineer, Material Engineer, Quality Engineer, Finance) to implement the continual improvement projects without impacting the factory schedule.
- Evaluated the workload at inventory areas and triggered hiring new headcount when needed.

## **EDUCATION**

#### **Certificate in Data Analytics:**

Monash University, Melbourne, VIC

2022

A 24 weeks intensive program focused on gaining skills in Python, SQL, MongoDB, R, VBA, HTML, JavaScript, Tableau, Big Data, and Machine Learning.

#### **Certified Supply Chain Professional (CSCP)**

ASCM - Association for Supply Chain Management

2021

#### **Certified in Production and Inventory Management (CPIM)**

ASCM - Association for Supply Chain Management

2020

#### **Bachelor's Degree in Electrical Engineering:**

Portland State University, Portland, Oregon, USA

2011
